Ahmed Hadi

IoT Engineer I Full-Stack Developer I AI Specialist

Malaysia | **+601135420412** | **ahmed777hady@gmail.com** | **GitHub** | **Linkedin** | **Portfolio**

AI-powered Full Stack Developer and IoT Engineer with expertise in building scalable web applications, real-time systems, and intelligent automation solutions. Skilled in React.js, Next.js, Node.js, PostgreSQL, and AI integrations using OpenAI and n8n. Experienced in developing digital twin platforms, AI-driven applications, and modern CMS websites using WordPress, Shopify, and Webflow. Passionate about creating innovative, high-performance solutions that combine AI, automation, and real-world impact.

PROFESSIONAL EXPERIENCE

Full Stack Developer & IoT Engineer | February 2023 – Present
Freelance / Personal Projects, Kuala Lumpur, Malaysia

Designed and developed full-stack web and mobile applications with a focus on scalable architecture and real-time systems. Built advanced IoT-based digital twin platforms capable of simulating and monitoring virtual devices in real time using WebSockets and cloud infrastructure.

Developed responsive frontends using React.js and Next.js with modern UI/UX principles, animations, and performance optimization. Engineered backend systems using Node.js and PostgreSQL, implementing RESTful APIs, authentication, and real-time data processing.

Created and deployed production-ready applications using platforms such as Render and Supabase, ensuring secure data handling, scalability, and efficient cloud integration. Integrated AI-driven features including automated content generation and intelligent system insights.

Collaborated on end-to-end project development, from system design and database architecture to deployment and user experience optimization. Continuously explored emerging technologies to build innovative, high-impact digital products.

AI Automation Specialist (n8n & AI Systems) | February 2024 – Present
Freelance / Automation Projects, Kuala Lumpur, Malaysia

Designed and implemented AI-powered automation systems using n8n, integrating APIs, databases, and third-party services to streamline business workflows.
• Built intelligent automation pipelines combining OpenAI (GPT-4), webhooks, and cloud services for content generation, notifications, and data processing.
• Developed end-to-end automation workflows for real-time data synchronization, task automation, and system orchestration across multiple platforms.
• Integrated AI chatbots and assistants into automation pipelines to handle user queries, generate responses, and perform automated decision-making tasks.
• Connected systems such as PostgreSQL, REST APIs, and external services using n8n to create scalable and reusable automation architectures.
• Automated business processes including lead generation, email workflows, reporting, and analytics dashboards.

CMS Developer (WordPress, Shopify & Webflow) | February 2025 – Present
Freelance / Web Development Projects, Kuala Lumpur, Malaysia

• Designed and developed professional websites using WordPress, Shopify, and Webflow for business, e-commerce, and portfolio use cases.
• Built fully responsive and high-performance websites with modern UI/UX, ensuring cross-device compatibility and optimized user experience.
• Customized WordPress themes and plugins, including REST API integrations and application password authentication.
• Developed and managed Shopify stores, including product setup, payment integration, and conversion-focused design improvements.
• Created visually advanced Webflow websites with animations, interactions, and CMS-driven dynamic content.

EDUCATION

Bachelor's Degree in Internet of Things (IoT Engineering)
Universiti Islam Antarabangsa Tuanku Syed Sirajuddin (UniSIRAJ), Malaysia February 2022 – Present

Studying Internet of Things (IoT) Engineering with a focus on building smart systems, real-time data processing, and connected device architectures. Gaining hands-on experience in developing IoT applications, sensor integration, and cloud-based systems.

Working on advanced projects including digital twin platforms, real-time device simulation, and intelligent monitoring systems. Applying knowledge of networking, embedded systems, and software engineering to design scalable and efficient IoT solutions.

KEY SKILLS

- Full Stack Development
- AI specialist
- Backend: Node.js Express.js RESTful APIs WebSockets (Real-time Systems)
- Database & Cloud: PostgreSQL Supabase Firebase Cloud Deployment (Render)
- IoT Systems Development
- Frontend: React.js Next.js JavaScript (ES6+) TypeScript HTML5 CSS3 Tailwind CSS
- AI & Automation: OpenAI API (GPT-4) LangChain AI Chatbots Development AI Content Generation Workflow Automation (n8n) API Integration Data Pipelines
- CMS & Platforms :WordPress, Shopify, Webflow

CERTIFICATIONS

- Managing Clean Core for SAP S/4HANA Cloud, SAP | September 2024
  www.credly.com/badges/07d...

  Applied clean core principles to maintain scalable, cloud-compliant ERP systems. Gained knowledge in enterprise system architecture, integrations, and cloud transition strategies.

- CC Course Pre-assessment, ISC2 | September 2024

  Developed foundational knowledge in cybersecurity, including risk management, security principles, and system protection.

- Undergraduate Certificate in Marketing, University of the People | June 2025

  Gained knowledge in marketing strategy, customer behavior, and business development to support building scalable digital products.

- JavaScript Masterclass: Beginner to Expert Bootcamp, Udemy | September 2024

  Mastered JavaScript fundamentals, ES6+, asynchronous programming, DOM manipulation, and real-world application development.
